Foshan Mattkay Packing Machinery Co., Ltd. was established in Foshan, China in 2014. It is a national high-tech enterprise. Its products have passed GB/T 19001-2016 / ISO9001:2015 quality management system certification, EU CE certification, and foreign trade business license. It also has more than 30 technical patents. It is an innovative private enterprise in Foshan. It focuses on providing high-quality automated packaging equipment and packaging production line solutions, and provides global brand companies with fully automatic cartoning machines, bag packaging machines, case packing machines, labeling machines, inkjet printers and other equipment. The company adheres to the concept of quality-centered, innovation-oriented, and service-oriented, and practices a rigorous and pragmatic style of work. It has won high praise from many customers. Its products and equipment are sold at home and abroad, and its application fields cover food, medicine, medical equipment, toys, stationery, 3C electronics, digital products, auto parts and decorations, hardware products, etc.

The company has a group of experienced technicians, specializing in automation control, intelligent metering and packaging machinery. Technicians account for 63% of the total number of employees, including 4 professional engineers with more than ten years of experience, providing customers with satisfactory solutions and non-standard equipment. Over the years, we have independently developed a variety of vertical/horizontal cartoning machines and control systems, gradually realizing innovation-driven, intelligence-centric, safe and efficient provision of comprehensive automation industry upgrade services for global manufacturing companies.

Vision

- * To become the most respected and innovative industry leader
- * Cultivate outstanding talents
- * Manufacturing excellent products
- * Contribute outstanding value

Values

- * Individuals enhance their value
- * Teams realize their value
- * Enterprises create value

Idea

- * Start a business
- * build a monument
- * make friends
- * expand the market

Corporate style

- * Vigorous execution

2014

- Tongbo Packaging Machinery was established

2015~2017

- Cartoning machine R&D department established
- Fully automatic horizontal/vertical cartoning machines officially launched for sale

2018

- Positioning the mid-to-high-end brand model
- Obtaining import and export foreign trade business license

2019

- Established a foreign trade sales team to enter overseas markets
- The domestic market entered a period of rapid development; the independently developed new MTK-120 and MTK-130 series automatic cartoning machines were officially launched and granted invention patents

2020

- Passed CE certification and ISO9001 international quality certification system
- serving customers with standardized, professional production and technical support

2021

- The self-developed large-scale paper box automatic cartoning machine was officially launched and granted an invention patent
- In the same year, a contract was signed to customize the Beijing Winter Olympics mask production line.

2022

- Mattkay Packaging Machine R&D applied for 16 product patents
- Obtained high-tech enterprise certificate

Main markets and Partners

Foshan Mattkay Packing Machinery Co.,Ltd.

迈特凯包装机

Partners

One-stop solution provider for China's intelligent packaging equipment manufacturing

迈特凯包装机

Applications

One-stop solution provider for China's intelligent packaging equipment manufacturing

● Food Industry

Biscuits, noodles, snail noodles, moon cakes, frozen foods, milk powder, candy, chocolate and other foods are packed in bags, boxes and cases.

● Pharmaceutical Industry

Tablets, capsules, medicine bottles, granules, oral liquids, masks, gloves, testing reagents, etc.

● Toys and stationery industry

Various toys and stationery

● Cosmetics Industry

Facial cleanser, moisturizer, facial mask, hand cream
Eye cream, lipstick, eyebrow pencil, etc.

● 3C Electronic Products

Data cables, chargers, shavers, mice, power banks, e-cigarettes, and other small appliances

● Hardware accessories industry

Bearings, hardware locks, accessories, automotive accessories, etc.

packaging equipment manufacturing

Main Product

Foshan Mattkay Packing Machinery Co.,Ltd.

迈特凯包装机

Application case:

Automatic boxing + case packing + case sealing packaging line

One-stop solution provider for China's intelligent packaging equipment manufacturing

- A complete set of automated packaging solutions, safe, simple and efficient
- Excellent assembly technology, precise coordination of production line equipment, automated production
- Automatic counting function, positioning, photoelectric eye automatic detection and tracking system, No material, no box opening
- Wide compatibility, easy adjustment, suitable for packaging products of various sizes

Cartoning Machine

1. PLC program control, no manual intervention required, speed up to 2-30 boxes/minute,
2. German IGUS linear positioning system, high positioning accuracy, accurate movement
3. The variable frequency motor independently drives different mechanical mechanisms to lift, translate and lower the product

Automatic cartoning machine

1. Stable packaging speed can be set within 10-80 boxes/minute
2. Compatible with multiple paper box packaging, easy to adjust, and one machine for multiple uses
3. With automatic material sorting, box opening, material box feeding, box sealing and other functions
4. With automatic counting, glue (spray glue) box sealing function

Box opener

1. Imported photoelectric detection system, which can quickly open thin and small cartons
2. Convenient switching of cartons of different sizes
3. The unpacking action is completed continuously and automatically, with stable performance and strong applicability
4. Equipped with organic glass protective cover and automatic alarm function, high safety

Carton sealing machine

1. Automatically fold the lid and automatically stick the tape on the top and bottom, no manual operation required
2. Use instant tape to seal the carton, which not only has a beautiful sealing effect, but also has a firm sealing
3. The use of matching automated packaging lines will better reflect the value of this machine.

迈特凯包装机

Application examples:

Bagging + automatic counting + box packaging line

One-stop solution provider for China's intelligent packaging equipment manufacturing

- This bagging-cartoning packaging production line consists of a bagging packaging machine, a counting and unloading machine, and an automatic cartoning machine;
- Speed 8-60 boxes/minute,
- Mainly used for food, such as bagged granules, coffee, milk powder, sugar, enzymes, coconut powder, oatmeal, meal replacement powder, whole grain powder, Panax notoginseng powder, etc., automatic strip packing, counting and cartoning.
- The product is fully automatically packaged from bagging to cartoning, without manual intervention; saving labor costs.

Pillow packaging machines, vertical packaging machines, bag-feeding packaging machines, etc. can be customized according to product requirements and connected with cartoning machines

● Automatic counting and sorting machine

1. With automatic counting and unloading function
2. Multiple columns of counting and unloading can be configured according to needs

● Granule/powder bag packaging machine

1. Packaging speed 5-60 packs/minute
2. The whole machine is made of stainless steel, with oil pressure lifting, especially suitable for GMP certification
3. Maintenance-free reduction motor, low noise, long life, lifetime warranty.

● Automatic cartoning machine

1. Stable packaging speed can be set within 5-60 boxes/minute
2. Compatible with multiple paper box packaging, easy to adjust, and one machine for multiple uses
3. With automatic material sorting, box opening, material box feeding, box sealing and other functions
4. With automatic counting, glue (spray glue) box sealing function

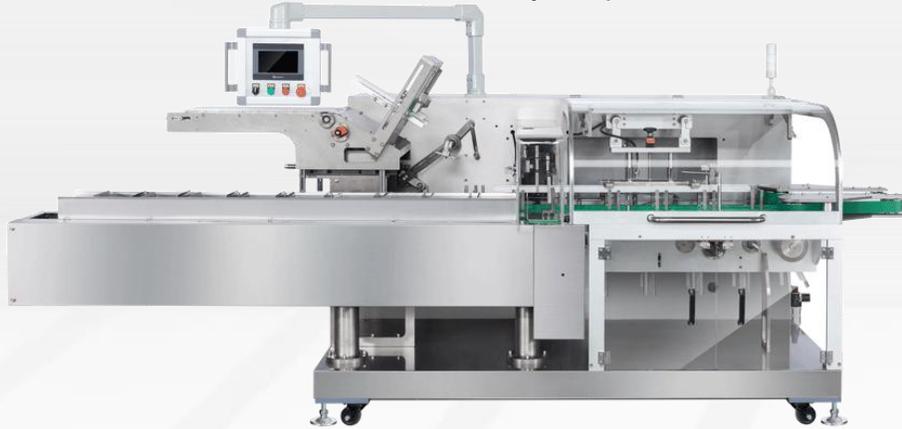

迈特凯包装机

Automatic cartoning machine series(horizontal)

One-stop solution provider for China's intelligent packaging equipment manufacturing

• Features

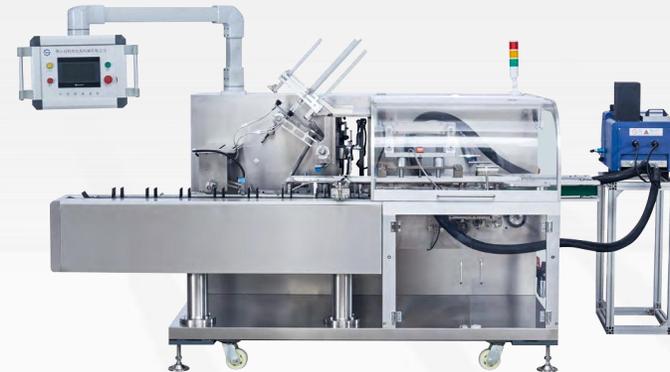

There are two types of horizontal automatic cartoning machines: box insertion type and glue spraying type. Users can choose according to the sealing method of the product. The machine adopts a flat pushing method to feed materials. The packaging speed is within 10-80 boxes/minute, and the stable speed can be set according to product requirements; it has functions such as automatic box opening, box loading, and box sealing, and can also be equipped with automatic material sorting lines, labeling machines, case packing machines, etc. according to needs; it has strong compatibility, and the paper box can be adjusted freely within 50*25*15mm~300*300*260mm, which is easy to operate.

Tongue-type (horizontal) automatic cartoning machine

• Application

It is suitable for paper box packaging in various fields such as food, medicine, electronic products, hardware accessories, auto accessories, cosmetics, daily necessities, etc.

Glue spraying (horizontal) automatic cartoning machine

迈特凯包装机

Automatic cartoning machine series (vertical)

One-stop solution provider for China's intelligent packaging equipment manufacturing

• Features

The vertical automatic cartoning machine uses a standing carton method to open, pack and seal the carton; it is suitable for packaging various powders, granules, strip packs, bulk materials or products with regular and specified directions; the stable packaging speed can be adjusted within 10-60 boxes/minute according to product requirements; it is compatible with a variety of carton packaging. This machine can be manually discharged, or equipped with a multi-axis manipulator or a fixed hopper, a turret hopper and various production line systems for integrated online discharge, such as filling machine production line, multi-faceted sealing production line, combined multi-head scale, etc.

Vertical automatic cartoning machine

• Application

It is suitable for paper box packaging in various fields such as food, medicine, medical equipment, electronic products, hardware accessories, automotive accessories, cosmetics, daily necessities, etc.

• Features

Our company's bag packaging machine series include pillow packaging machines, four-side sealing packaging machines, vertical packaging machines, heat shrink packaging machines, etc. The packaging performance and stability can meet the bagging needs of products in various industries.

• Application

Suitable for all kinds of fruits, vegetables, biscuits, candies, bread, daily necessities, hotel supplies, instant noodles, moon cakes, medical supplies, rice noodles, noodles, hardware, electronic products, toys, stationery, frozen foods, various foods, cosmetics, skin care products, etc.

• Features

Our company's automatic carton opening machine series include automatic carton opening machine, high-speed carton opening machine, and automatic carton forming and bottom sealing machine. The carton opening speed is 1-20 boxes/minute. It is a special equipment that opens the carton board, folds the bottom of the box according to a certain procedure, seals it with tape, and then conveys it to the case packing machine.

• Application

Applicable to various industries such as food, medicine, beverage, tobacco, daily chemicals, electronics, etc.

• Features

There are two main types of automatic cartoning machines. One is a side-push cartoning machine, which turns the carton sideways and pushes the material into the carton through a push mechanism. The principle is somewhat similar to that of a horizontal cartoning machine. The arrangement of the products is determined according to user requirements, and the pneumatic alignment mechanism arranges the products and pushes them into the carton. The other is a robot cartoning machine, which greatly improves the flexibility, stability and reliability of the cartoning line by changing the fixture and setting different grabbing programs.

Side push automatic carton packing machine

• Application

Applicable to various foods, medicines, medical supplies, cosmetics, daily necessities, skin care products, electronic products, hardware, automotive accessories, etc.

Vertical automatic carton packing machine

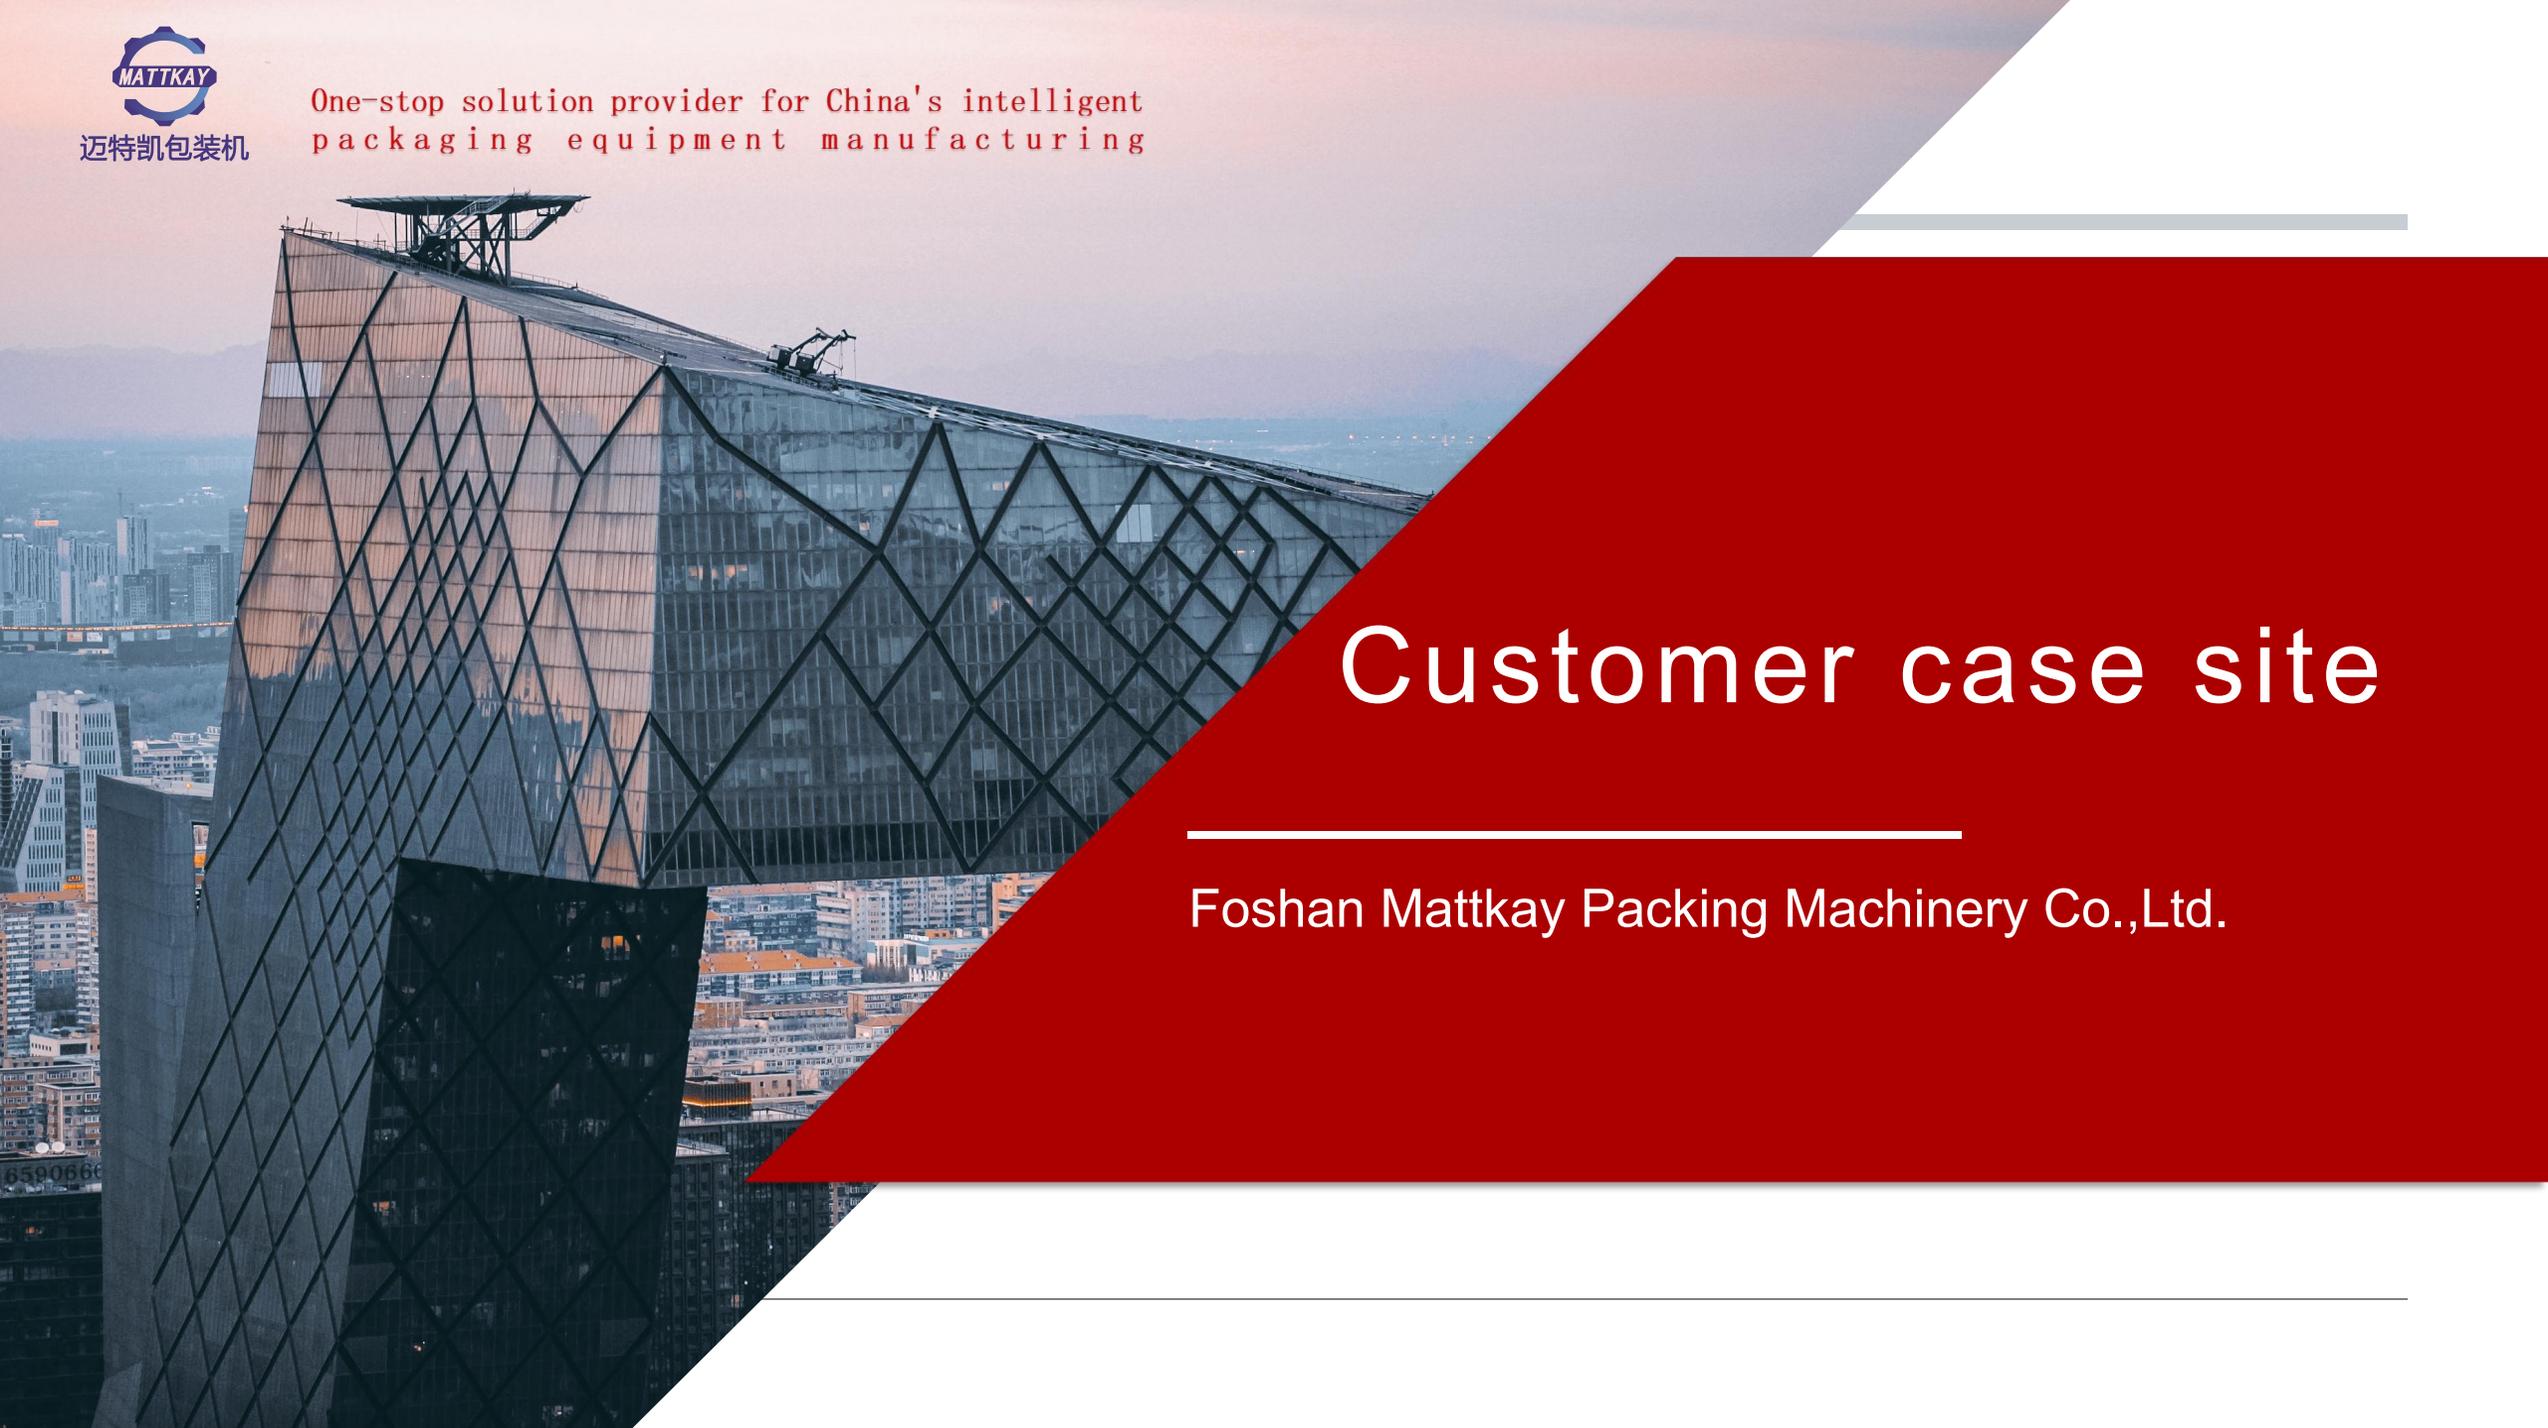

• Features

Our company's automatic carton sealing machine series include automatic four-corner carton sealing machines, automatic folding and sealing baling machines, fully automatic corner and edge carton sealing machines, upper and lower drive carton sealing machines, etc., which can meet the product packing needs of various industries.

• Application

Applicable to various foods, medicines, medical supplies, cosmetics, daily necessities, skin care products, electronic products, hardware, automotive accessories, etc.
